Etobicoke Brampton Sleep Clinic (EBSC)

106- Humber College Blvd, suite 202, Etobicoke M9V 4E4, ON

Ph: 416-742-0680 Fax: 416-742-0681

Dear Doctor - Please visit our website (<http://www.ebsleepclinic.com>) or see our COVID-19 related educational videos on YouTube to learn more about the following:

- We have updated our infection prevention policy and have created educational videos on our website and YouTube for review by referring physicians and patients.
- Our ventilation system meets the requirements of CAN/CSA-Z317.2 for HVAC and is regularly inspected by an independent HVAC company.
- We have invented a unique device that extricates the potentially pathogenic aerosols from CPAP masks and removes them from the clinic. You can learn more about this process by watching the videos on our website or on YouTube.
- We have acquired AirPura UV600 Hepa Filter machines for the CPAP titration rooms to deliver a superior level of airborne pathogenic control. This particular Hepa filter machine is touted for its UV light and provide approximately 38 Air changes per hour.
- In addition, there are 14 additional air changes per hour produced by 2 other dedicated HVAC units.

Dr. Harneet Singh, M.D., D.ABPN, D.ABSM
Sleep Specialist
